

Bus and Coach Solution

Driving efficiency in your operation

Efficiency is the key to profitability for any bus or coach operator. Obvious - yes. Easy to achieve – no...until now.

Real efficiency means vehicles need to be on the road, they need to run on time and be utilized to achieve the best cents per kilometer. In addition, operations need to run smoothly and the back office must capture all the metrics and report in real time.

Moore Stephens Technology Australia (MSTA), a leading ERP provider, has developed a Microsoft Dynamics AX-based solution specifically for the bus and coach industry.

The system, Bus and Coach Solution (BaCS), will deliver the front and back office efficiency and compliance you need to maintain your accreditation and adherence to MOT standards.

BaCS

BaCS brings the renowned capabilities of proven Microsoft technologies to the bus and coach industry. BaCS with its easy to use screens automates, streamlines, tracks and reports on all elements of a bus and coach operation and is scalable to operations of any size and complexity.

BaCS integrates all operational areas including transport management, human resource management, finance, customer relationship management, business analysis and supply chain management.

Because BaCS has been designed from the ground up for the bus and coach industry, it will slot seamlessly into your operation.

And it's smart. BaCS uses one central database which means data need only be entered once and the system intuitively populates relevant modules. For example: if you report a defect that means a vehicle must come off the road, the system creates a job in the engineering schedule, removes the vehicle from the roster, alerts the engineering manager, replaces the vehicles in the roster with an equivalent vehicle and matches a job profile so that spare parts are used or ordered to suite the work required.

At Moore Stephens, we take your success personally.

Our commitment to the mid-market means we have a real understanding of the environment in which our clients operate and are ideally placed to help them grow and prosper.

The benefits

Some of many benefits BaCS will deliver include:

- Reduction in time to create, monitor and publish rosters
- Automatic engineering management and purchasing
- Automatic cash and ticket reconciliation
- Integrated charter system with availability, quoting, pricing and client reminders
- Touch screen technology
- Data integration with DataFuel, Austrics, HASTUS, ERG - automating these processes
- KPI Reporting ability
- Reduced risk of non-compliance
- Automated SMS to ensure visibility
- Alerts, SMS (text messaging), ITLS monitoring, email
- BOAS management and recording
- Multi-sited (depots)
- Full integration with common Microsoft products
- Leverages off existing software investments

The System

Microsoft Dynamics AX 2009 is a comprehensive business management solution for mid-sized and larger organizations that works like and with familiar Microsoft software to help your people improve productivity. Microsoft Dynamics AX is built to make it easy to do business across locations and countries by consolidating and standardizing processes, providing visibility across your organization, and help in simplifying compliance. With Microsoft Dynamics AX, you can be confident your business management solution is, and will continue to be, relevant to the needs of your people and the demands of your industry and business.

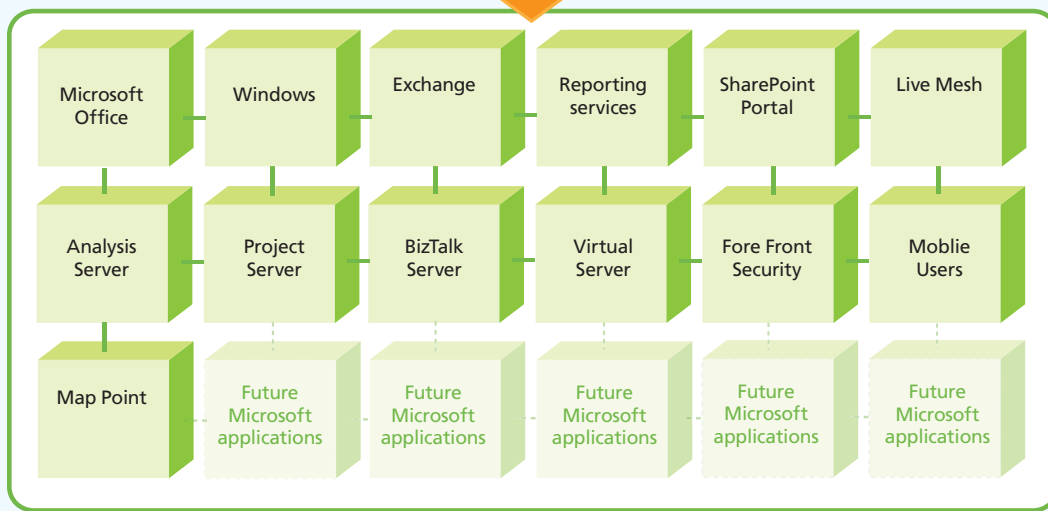

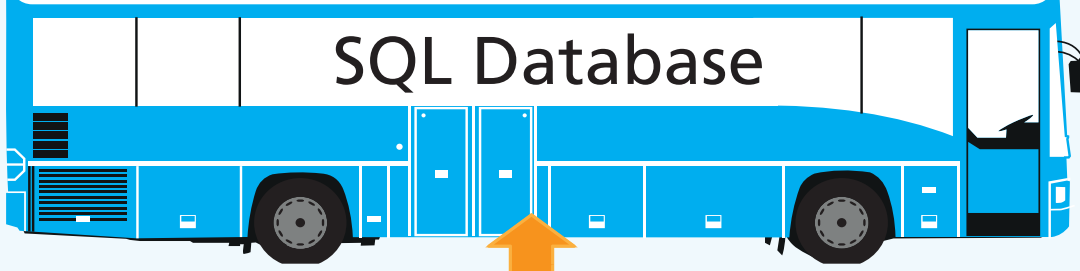

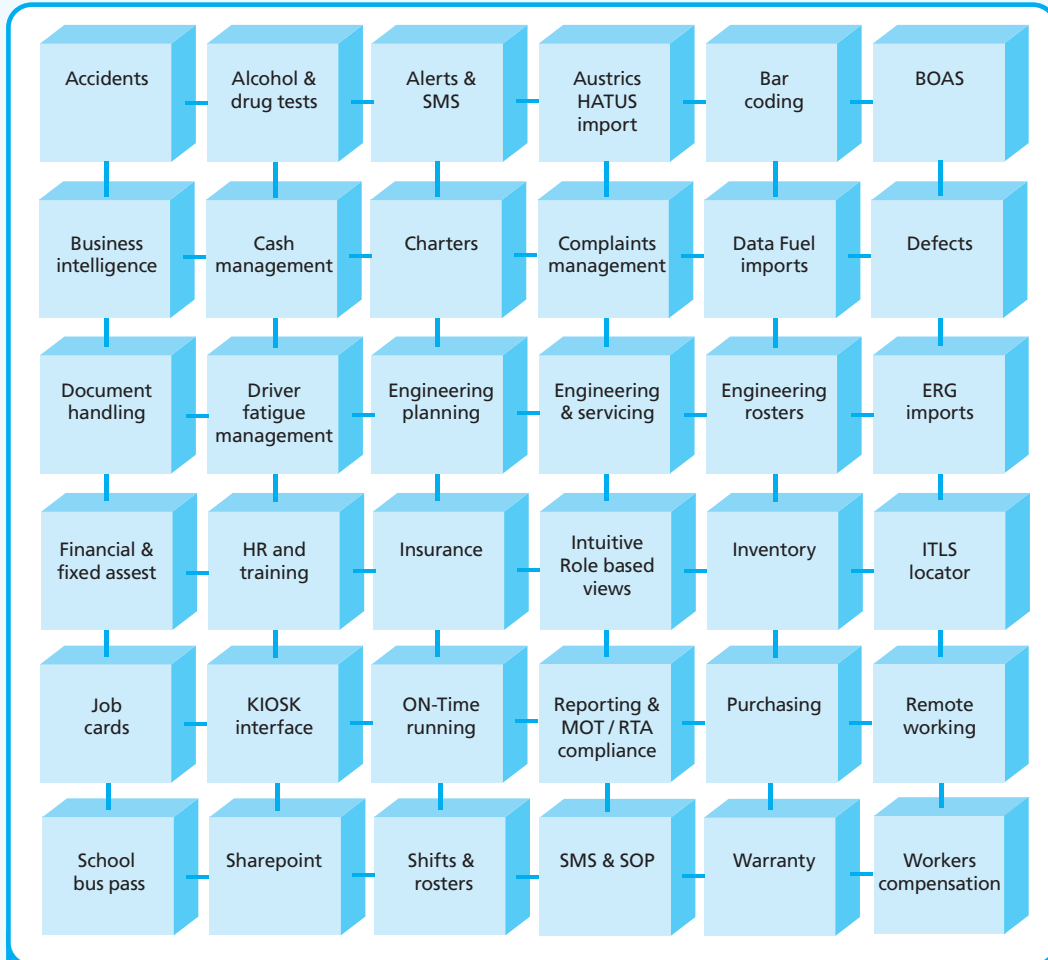

Don't waste any more time or money
